From: Jeff Van Skike, City of Phoenix

Subject: Modification to Section 618 Storm Drain Construction

This change will require a video inspection of the mainline pipe before final paving is allowed.

Add new Section 618.5, renumber existing 618.5 and 618.6 to 618.6 and 618.7, respectively:

618.5 VIDEOTAPING OF NEW MAINLINE STORM DRAINS:

The Contractor shall provide the Engineer with an annotated video inspection record (either VHS or DVD format) of the entire mainline storm drain pipeline. The video shall clearly show all joints, seals, connecting pipes, and manholes. This video shall be provided to the Engineer, and reviewed and approved by the Engineer prior to the Contractor being allowed to place the final pavement over the storm drain line. No separate payment will be made for this inspection; the cost of the video inspection shall be included in the cost of the pipe.
